K

To Honorable

Principle Chief Conservator of Forests

Concerning the Sy. No. 1492, for which was obtained the approval for the Construction for establishment of Faecal Sludge Treatment Plant (as per attached notification DOC1.), despite the strict specifications (as per attached clarifications for proposal processing DOC2) of protecting the area and do not use it as a dumping yard, it is openly witnessed its use as dumping and burning area of solid waste (as per attached visual data of last 4th December)

It is well depicted that the assigned forest area is adversely impacting the environment, its fauna and flora, as well as the limitrophe population.

In view of this situation, we request an updated inspection to the place, and the information if the permission assigned is also for Solid Waste Disposal Unit.

Thanks in advance for your attention, care, and action,
with the best greetings,

Ana S.

President
